

# Fukushima Science Park Facility Tour

Fukushima Science Park is a facility certified as a Next Generation Energy Park in Fukushima City, Fukushima Prefecture.

You can tour the mobile hydrogen station, which supplies hydrogen produced using Fukushima's solar-based renewable energy. There are fewer than 30 of these stations nationwide, and this is the only one in Tohoku.

The site also features an educational facility adjacent to the solar power plant, where you can learn about various renewable energy systems such as solar and small-scale hydropower. From the observation deck, you can overlook about 8,000 solar panels. Why not learn about environmentally friendly energy in a nature-rich setting?

## Schedule

-	-	【1 <sup>st</sup> day】 Convention or seminar in Sendai
9:00	10:00	【Last day】 Transfer 64km by car
10:30	11:30	Site Tour 60min
